AdamsBlinds

ALUMINIUM VENETIAN BLINDS

Choosing Aluminium Venetian Blinds

Start with slat width

15-16 mm suits a fine appearance; 25 mm is an adaptable everyday size; 35 and 50 mm creates a stronger architectural look.

Choose operation

Wand and cord, mono-chain, and selected motorised systems operate differently. Confirm child safety and electrical access.

Choose finish

Compare physical samples in your own daylight. Check compatibility for each manufacturer and slat width.

Confirm fitting

Measure recess dimensions, handles, opening direction and available stacking space. AdamsBlinds confirms the final dimensions.
