02 / WINDOW CHECKLIST

Record the opening clearly

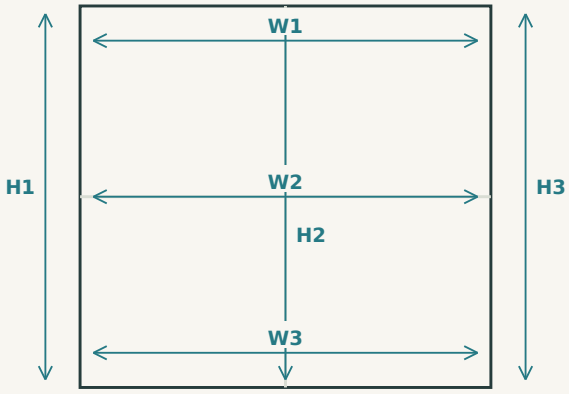

Use one copy for each window. These readings support an initial estimate; they are not final manufacturing dimensions or installation instructions.

Room / window reference

Postcode and house / building number

Record width and height in millimetres

RECORD ALL SIX READINGS

Generic opening - not a fitting diagram

Reading	Opening size
W1 - top width	_____ mm
W2 - middle width	_____ mm
W3 - bottom width	_____ mm
H1 - left height	_____ mm
H2 - middle height	_____ mm
H3 - right height	_____ mm

Send every reading, including any differences. Do not subtract a general allowance or add a guessed overlap. AdamsBlinds confirms the required measurement format for recess, edge or surface fitting.

Available recess depth / projecting handles / opening direction

Tell us what is in the way

Note vents, hinges, tiles, trims, uneven reveals, a sloping sill and nearby furniture. Include access for operating and charging the blind, where relevant.

02 / WINDOW CHECKLIST

Send photographs that answer questions

A few useful views help us assess the opening. Take photographs from a safe position and label them with the same window reference as your measurements.

Photo	What to show
1. Front view	The full window, all four edges, sill and nearby wall. Keep the camera facing the opening as squarely as practical.
2. Side view	The recess depth, projecting handle and space where the cassette and side rails could sit.
3. Opening view	How the window opens and whether any sash or handle moves towards the proposed blind position.
4. Detail view	Any uneven area, vent, trim, tile, sloping sill or other obstruction that could affect fitting.
5. Room view	Access to the window, furniture, possible control position and charging access for a motorised blind.

The website form accepts up to five images. For several windows, send a representative set and describe any differences; the team can request further details.

Include these points in your enquiry

- ☐ Your name, email, telephone number and installation or delivery postcode.
- ☐ The number of blinds, preferred system and fabric names, or ask us to advise.
- ☐ Supply only or measuring and installation; domestic, commercial or another project type.
- ☐ Whether you want an initial estimate or an appointment discussion, and your preferred contact method.

A separate assessment may be needed
Bay windows, angled recesses and roof windows are outside the standard application shown in this collection. Inward-opening windows, deep handles and unusual reveals need a clearance review before an order is accepted.

Next step
Send this information through the AdamsBlinds collection form, by email or by WhatsApp. We confirm the product, fitting position and measurement format before an order proceeds. Appointment dates are offered after reviewing the enquiry.
