DREAM CONTROLS & HUBS

Dream Sun Sensor

Product reference: 191727

A sunlight-responsive accessory for a compatible Dream motor and control arrangement.

- Responds to changing sunlight
- Published light-level operating range
- Can support an agreed automated shading routine

Key specifications

Product reference	191727
Measured condition	Sunlight intensity
Published operational light range	15,000-75,000 lux
System requirement	Compatible Dream motor/control arrangement

Options to discuss

- Assessed sensor location
- Appropriate motor pairing and settings
- Local control retained where required

Before you order

- Performance depends on positioning and the light reaching the sensor.
- A sensor alone does not establish thermal or energy performance for a room.
