- Bluetooth configuration
- Optional Ethernet network connection
- Published capacity of 30 motors per hub

Key specifications

Product reference	191733
Power connection	USB-C
Configuration	Bluetooth setup
Network option	Optional LAN/Ethernet connectivity
Published motor capacity	30 motors per hub
Automation allocation	Up to 20 scenes, 20 timers and 20 rooms

Options to discuss

- Additional hubs for an assessed larger layout
- Supported app and voice-control setup
- Professional integration with the required driver and specialist commissioning

Before you order

- Bluetooth setup does not mean all remote or voice functions operate without a network.
- Siri Shortcuts support should not be read as native Matter or Apple Home certification.
