PLEATED & CELLULAR BLINDS

Motorised Roof Pleated Blind

Product reference: Motorised Roof Pleated Blind

A powered tensioned pleated blind for suitable roof glazing. Compare motor-specific width requirements and plan fabric, power and service access.

- Powered adjustment for overhead glazing
- Tensioned fabric support
- Configuration-specific control choices

Key specifications

Published maximum width	1500 mm
Published maximum drop	4000 mm
Dream roof-blind motor minimum width	360 mm
Dream pleated motor minimum width	520 mm for drops up to 2000 mm; 685 mm for greater drops
Hardware colours	White, anthracite or black

Options to discuss

- Suitable pleated or cellular fabric
- Compatible motor, remote and interface
- Agreed power and installation arrangements

Before you order

- Width, drop, fabric and motor limits must be assessed together.
- A motorised blind does not remove the need for safe future service access.
