HIVE & PLEATED BLINDS

Pleated blinds bring a beautiful, timeless feel to the home. They offer excellent light control and an elegant finish in a wide range of colours and designs. They are an easy to maintain option for the home.

Hive blinds feature a unique cellular structure which gives a modern, sleek look combined with energy-saving, heat-blocking and sound absorbent qualities. Their unique cellular fabric also has anti-static properties meaning dust is repelled and the blind stays fresher for longer.

OPERATING YOUR BLINDS: ALL THE OPTIONS EXPLAINED

To help you choose the best Pleated or Hive blind, we offer a wide selection of blind systems to suit various window styles and preferences.

Our standard freehanging blinds are a versatile choice, suitable for most common window types. They can be fitted either inside or outside the window recess and are operated with a simple pull cord.

If you need greater control over light and privacy, our top down bottom up blinds are an excellent option. These allow the blind to be positioned exactly where it's needed, offering flexibility and convenience.

For the softness of a sheer fabric during the day and the privacy of a blackout fabric in the evening, our Day & Night Transition blinds are ideal. With two fabric choices in a single blind, they provide the best of both worlds.

We also have a range of blinds that require no drilling or screwing, making them perfect for uPVC windows and doors. Our Perfect Fit and INTU blinds are quick and easy to install, and they allow windows and doors to be operated with the blinds in place—ideal for maintaining both shade and ventilation.

For bi-fold doors or smaller spaces, our INTU Micro system, with its more compact pleat and cell size, is a great solution.

Shaped windows are becoming increasingly popular, and we have specialised systems to cater for these unique requirements. We offer the following shaped blind options:

- Roof Rectangle
- Lantern and Skylight
- Roof Shaped
- Manual Shaped Freehang

For added ease, many of our Pleated and Hive blinds can be motorised using our market-leading Somfy motors, providing effortless operation—particularly useful for windows that are hard to reach or positioned high up. Motorised options are available for:

- Window Rectangle (Hive only)
- Roof Rectangle
- Lantern
- Roof Shaped
