Antiguan Blind

A motorised external ZIP screen for windows, doors and the open sides of pergolas.

Product shown in an example setting. Colours and options vary with the specification.

Antiguan provides adjustable shade in front of the glass, helping to limit glare and unwanted solar gain before they reach the room. The fabric runs within side guides, with a ZIP edge that keeps it located as the blind moves. When the screen is raised, the material and mechanism sit inside a protective cassette.

Suitable projects

- Windows and glazed extensions
- Bifold and sliding doors, with door clearances checked
- Side screening for suitable pergolas and verandas

Specification at a glance

Maximum width	6.0 m
Maximum height	6.0 m
Maximum surface area	18 m²
Movement	Vertical, ZIP-guided fabric
Operation	Somfy io motor; remote control
Standard frame finishes	Pure White or Anthracite Grey
Mounting	Face or side fixing, inside or outside a suitable reveal

Product summary for planning. Final specification and installation requirements are confirmed in your quotation; follow the instructions supplied with your order.

Antiguan Blind

Options, practical details and the next step

Choose your options

- Somfy io motor with remote control
- App operation with compatible additional equipment
- Optional sun and wind sensors
- Face or side fixing; spacers where the building needs them

Before you order

- Maximum width, height and area must all be respected together.
- Mesh fabric filters daylight; it does not make a room completely dark.
- Use within the installation-specific wind limits and keep the bottom rail clear.

Shade that follows the glass

For a wide glazed opening, an external screen offers a different result from an awning. It covers the glass directly and can be lowered to the position you need. We will help you balance solar protection, daylight and the view through the selected fabric.

Positioning around doors and handles

Bifold door stacks, projecting handles, vents and opening windows all affect the fixing position. Full-height spacers may provide the necessary stand-off. Send photographs of the opening and surrounding wall so we can identify likely restrictions before arranging the survey.

Common questions

Can Antiguan cover a 6 m by 6 m opening?

No. The individual width and height limits are both 6 m, but the maximum area is 18 m². We check the actual combination, fabric and fixing conditions before confirming a size.

Can the blind be fitted to an existing pergola?

Often, provided the structure can accept the guides and fixing loads. We need details of the posts, opening, roof and base before confirming suitability.

Request your quotation. Send your postcode, approximate dimensions and photographs. AdamsBlinds will discuss the specification, supply-only options or a survey and installation proposal. The final size, fabric, colour, controls, installation requirements and lead time are confirmed in your written quotation.
