Classic Pod

A made-to-measure aluminium pergola with rotating roof louvres and concealed drainage.

Product shown in an example setting. Colours and options vary with the specification.

Classic provides an adjustable outdoor roof in a footprint tailored to the project. The double-walled aluminium louvres rotate through up to 150°, allowing you to vary the daylight and ventilation beneath them. When closed, the blades direct rainwater into the frame's guttering and down through the posts.

Suitable projects

- Garden dining areas
- Patios alongside the house
- Freestanding seating spaces

Specification at a glance

Maximum single-module length	5.95 m
Maximum louvre span	4.50 m
Roof movement	Rotation up to 150°
Standard finish	Anthracite Grey
Layouts	Freestanding or lean-to
Screen position	Below the cross beams
Drainage	Concealed guttering with drainage through the posts

Product summary for planning. Final specification and installation requirements are confirmed in your quotation; follow the instructions supplied with your order.

Classic Pod

Options, practical details and the next step

Choose your options

- Freestanding or lean-to layout
- Side screens mounted below the cross beams
- Dimmable LED lighting in roof louvres
- Infra-red heating and compatible smart controls

Before you order

- The maximum dimensions remain subject to site conditions and structural assessment.
- Side screens are optional and have their own operating limits.
- An outdoor pergola is not an insulated or fully sealed conservatory.

Made around the space you have

A bespoke footprint helps align the posts with an existing terrace, door opening or furniture layout. We review the position of each support and the usable space below the beams before the design is fixed.

Light, shade and air movement

The roof can be tilted to admit daylight while allowing warm air to escape. It can also be closed for rain protection within its design limits. The right blade position depends on the sun direction and weather at the time.

Common questions

How is Classic different from Classic Lite?

Classic is made to measure within its model limits. Classic Lite is offered in set sizes. Both use rotating louvres and can accept suitable optional accessories.

Can it attach to the house?

A lean-to arrangement may be suitable, subject to the building construction and fixing detail. The connection to the property, roof drainage and any flashing need to be planned.

Request your quotation. Send your postcode, approximate dimensions and photographs. AdamsBlinds will discuss the specification, supply-only options or a survey and installation proposal. The final size, fabric, colour, controls, installation requirements and lead time are confirmed in your written quotation.
