Cuba Awning

A rectangular full-cassette awning for larger terraces, with a coupled-width option.

Product shown in an example setting. Colours and options vary with the specification.

Cuba uses a square-edged cassette and concealed fixing details for a clean appearance against the façade. Its heavier-duty folding-arm arrangement supports larger installations than the compact awning models. A single unit can reach 7 m wide, while a suitable coupled arrangement can extend the overall width to 14 m.

Suitable projects

- Wider residential patios
- Restaurant and hospitality terraces
- Projects seeking a square-edged cassette design

Specification at a glance

Maximum single-unit width	7.0 m
Maximum coupled width	14.0 m, subject to layout
Maximum projection	3.75 m
Operation	Somfy io motor; remote control
Cassette	Fully enclosed, rectangular profile
Arm tensioning	Four sheathed stainless-steel cables
Pitch adjustment	5-38°; at least 14° required for rain run-off
Standard frame finishes	Pure White or Anthracite Grey

Product summary for planning. Final specification and installation requirements are confirmed in your quotation; follow the instructions supplied with your order.

Cuba Awning

Options, practical details and the next step

Choose your options

- Somfy io motor and remote control
- Compatible smartphone control equipment
- Optional sun and wind sensors
- Dimmable warm white LED lighting and infra-red heating
- Standard or bespoke supporting brackets

Before you order

- The 14 m width is a coupled arrangement, not one uninterrupted standard unit.
- The full width-and-projection combination needs confirmation.
- The installation must provide appropriate support and safe clearance at the front edge.

Cover a larger seating area

Cuba is worth considering when a smaller awning would leave part of the table or terrace exposed. We look at the usable shaded area, furniture positions and the sun direction, then check the dimensions against the proposed fixing structure.

Understand a coupled installation

A wide terrace may use a coupled system. This affects the cassette arrangement, supporting brackets and the way the fabric area is divided. We explain those details before quoting so the finished appearance is clear.

Common questions

Can Cuba be ordered 14 m wide?

A suitable coupled arrangement can reach that overall width. It requires a project-specific layout; the normal single-unit maximum is 7 m.

Is Cuba a waterproof canopy?

It is a retractable fabric awning. Its water-repellent fabric can shed rain showers at the correct pitch, but it must be operated within the supplied weather limits.

Request your quotation. Send your postcode, approximate dimensions and photographs. AdamsBlinds will discuss the specification, supply-only options or a survey and installation proposal. The final size, fabric, colour, controls, installation requirements and lead time are confirmed in your written quotation.
