Deluxe Pod

A flexible louvred pergola for bespoke layouts, linked modules and integrated side screens.

Product shown in an example setting. Colours and options vary with the specification.

Deluxe is designed for projects that need greater freedom in the layout. It can stand independently, connect to a building or provide a roof within a suitable existing structure. Modules can be linked, and the optional fabric side screens are concealed in the cross beams for a more integrated finish.

Suitable projects

- Larger residential terraces
- Hospitality and commercial outdoor seating
- Projects with an existing engineered supporting structure

Specification at a glance

Published single-module combinations	Up to 6.0 × 4.5 m or 7.0 × 4.0 m, subject to specification
Roof movement	Rotation up to 150°
Louvre width	210 mm
Layouts	Freestanding, lean-to or roof-only; modules can be linked
Standard frame finishes	Pure White or Anthracite Grey
Screen position	Integrated within the cross beams
Drainage	Concealed gutters and nominated drainage posts

Product summary for planning. Final specification and installation requirements are confirmed in your quotation; follow the instructions supplied with your order.

Deluxe Pod

Options, practical details and the next step

Choose your options

- Roof louvres rotating through up to 150°
- Frame colour options confirmed when quoting
- Integrated side screens
- Dimmable lighting in beams and/or louvres
- Infra-red heating and compatible controls

Before you order

- The published 7 m length and 4.5 m span are not a single combined maximum.
- Linked modules still require a planned support and drainage layout.
- Roof-only installations require suitable supporting construction.

Design the outdoor area as a whole

For a larger terrace, the position of posts and the division between modules matter as much as the total covered area. We can discuss separate dining and lounging zones, circulation routes and how the structure meets the property.

Keep screens visually integrated

On Deluxe, optional side screens can sit within the cross beams. This produces a cleaner outline when the screens are raised, but the side opening and guide arrangement still need to be designed around the posts.

Common questions

Can Deluxe cover more than one module?

Yes. Modules can be linked across length and width, subject to the required supports, drainage and engineering assessment.

Is the maximum size 7 m by 4.5 m?

That combination should not be assumed. Published detail information gives configurations up to 6 m by 4.5 m or 7 m by 4 m. We confirm the exact permitted combination for your project.

Request your quotation. Send your postcode, approximate dimensions and photographs. AdamsBlinds will discuss the specification, supply-only options or a survey and installation proposal. The final size, fabric, colour, controls, installation requirements and lead time are confirmed in your written quotation.
