Tortola Awning

A motorised full-cassette awning for everyday shade on domestic patios and terraces.

Product shown in an example setting. Colours and options vary with the specification.

Tortola combines a slim rounded cassette with remote-controlled operation. Its folding arms support the canopy through its travel, and the enclosed housing protects the fabric and mechanism when retracted. The end-fixing design can be useful where the available wall area calls for a considered bracket arrangement.

Suitable projects

- Domestic patio dining areas
- Terraces outside sliding or bifold doors
- Suitable extensions and bungalows

Specification at a glance

Maximum width	5.0 m
Maximum projection	3.0 m
Operation	Somfy io motor; remote control
Cassette	Fully enclosed, cylindrical profile
Arm tensioning	Twin sheathed stainless-steel cables
Pitch adjustment	0-45°; at least 14° required for rain run-off
Standard frame finishes	Pure White or Anthracite Grey

Product summary for planning. Final specification and installation requirements are confirmed in your quotation; follow the instructions supplied with your order.

Tortola Awning

Options, practical details and the next step

Choose your options

- Somfy io motor and handheld remote
- App operation with compatible additional equipment
- Optional wind and sun sensors
- Warm white LED lighting and infra-red heating

Before you order

- Power, load-bearing fixing positions and the canopy pitch must be checked.
- Fabric is water repellent rather than a substitute for a permanent roof.
- Weather sensors provide assistance but do not remove the need to follow operating limits.

Easy shade at the press of a button

Remote operation makes it easier to adjust the awning as the sun moves across the terrace. If you want grouped control, app access or automatic responses to sunlight, we can include the compatible equipment in the specification.

Make the mounting look deliberate

The cassette may be small, but the forces at the wall still need proper consideration. Fixing into suitable masonry, addressing low eaves and allowing for pipes or other obstructions are all part of arriving at a neat, reliable installation.

Common questions

How does Tortola differ from Anguilla?

Both use a compact full-cassette approach with the same published maximum dimensions. Tortola is motorised as standard, while Anguilla starts with manual crank operation.

Do I need Wi-Fi for the remote control?

A compatible radio handset operates the motor directly. Smartphone features require the appropriate additional system and network arrangements; these are specified separately.

Request your quotation. Send your postcode, approximate dimensions and photographs. AdamsBlinds will discuss the specification, supply-only options or a survey and installation proposal. The final size, fabric, colour, controls, installation requirements and lead time are confirmed in your written quotation.
