CONTROLS & ACCESSORIES

Hexacell Adjustable Draw Pole

Product reference: Adjustable Draw Pole

Extend your reach to a compatible manual SkyLite or Sliderscreen LITE blind. Choose a draw-pole length around the blind and the room.

- Two adjustable reach ranges
- Manual operation from a suitable standing position
- Useful with an assessed high-level blind layout

Key specifications

Short adjustable version	1000-1680 mm
Long adjustable version	1400-2500 mm
Operation	Manual hook-and-pole operation
Compatibility	Selected SkyLite and Sliderscreen LITE H-Screen arrangements; confirm with the blind specification

Options to discuss

- 1000-1680 mm pole
- 1400-2500 mm pole
- Confirm the matching blind handle or operating eyelet

Before you order

- Not a universal pole for every blind or roof window.
- Check clearance and comfortable reach before choosing the length.
- Investigate resistance rather than pulling harder on the rail.

Choose a practical reach

Measure the approximate distance from a comfortable standing position to the operating point. Allow room to engage the hook and move the blind smoothly through its travel. We can advise whether manual operation remains a sensible choice.

Keep the hook and handle matched

This accessory is intended for compatible manual SkyLite and LITE H-Screen arrangements. Confirm the rail handle or eyelet before ordering a replacement pole. It should not be used to force a stiff or misaligned blind.
