FREEHANGING CELLULAR BLINDS

Hexacell Freehanging Corded

Product reference: Freehanging Corded

A pull-cord cellular blind with compatible CelloTex fabrics. AdamsBlinds checks the control position, cord safety fittings and chosen window layout.

- Pull-cord operation
- Choice of compatible cellular fabric effects
- Control and safety fittings assessed with the installation

Key specifications

Control	Manual pull cords
Cord management	Appropriate cord cleats and installation-specific safety arrangement
Mounting	Suitable bracket and headrail arrangement
Fabric family	Compatible CelloTex cellular fabrics
Finished sizes	Confirmed for the selected mechanism, fabric and layout

Options to discuss

- Standard bottom-up layout
- Ask about suitable privacy configurations
- Confirmed control position and cord management
- Compatible side light blockers where suitable

Before you order

- Cords must be secured using the supplied safety arrangement and installed instructions.
- Furniture and climbing opportunities must be considered when positioning a cord-operated blind.
- Size and layout availability depend on the finished specification.

Plan where the cords will sit

Include a full window photograph with adjacent walls and furniture visible. This helps us assess whether a suitable cleat position and control route are available. Keep the safety fittings in place throughout the life of the blind.

Choose cloth around the room

A darker colour is not automatically a blackout fabric. Use the stated fabric effect and request a physical sample before selecting the colour. Tell us separately if edge light is likely to disturb sleep or affect a screen.
