FREEHANGING CELLULAR BLINDS

Hexacell Freehanging Cordless

Product reference: Freehanging Cordless

A cellular window blind adjusted directly at the bottom rail. Explore compatible fabrics, privacy layouts and fitting options with AdamsBlinds.

- Direct adjustment at the operating rail
- No hanging operating cord or chain
- Compatible CelloTex fabric choices

Key specifications

Control	Direct manual adjustment
Mounting	Bracket fixing or a suitable no-screw headrail arrangement
Fabric family	Compatible CelloTex cellular fabrics
Finished sizes	Confirmed for the selected fabric, layout and mechanism

Options to discuss

- Standard bottom-up layout
- Ask about a compatible top-down/bottom-up or day and night layout
- Suitable no-screw installation where the recess permits
- Assessed light blockers for reduced side leakage

Before you order

- The operating rail must be easy to reach from a safe standing position.
- Cordless operation does not make every mounting location suitable for children; placement and installation still matter.
- Blackout cloth alone does not remove light around the fabric edges.

Try the movement before settling the layout

Think about who will use the room and how far they can reach. The operating rail needs to remain accessible through its useful travel. Include the window height and the depth of nearby furniture in your enquiry.

Keep the fabric clear of obstacles

Handles, inward-opening casements and window decorations can catch a freehanging blind. We check the position of the headrail and the required clearance before confirming the fixing arrangement.
