FREEHANGING CELLULAR BLINDS

# Hexacell Freehanging Motorised

Product reference: Freehanging Motorised

Remote-operated cellular blinds for suitable vertical windows. Explore battery or mains arrangements, fabric choices and privacy layouts with AdamsBlinds.

- Remote operation for convenient adjustment
- Battery and mains configurations available
- Assessed standard or top-down/bottom-up movement

## Key specifications

| | |
|---|---|
| **Control** | Compatible motor and radio handset |
| **Motor family** | AOK options selected for the required movement |
| **Power** | Suitable battery arrangement or mains connection with the specified supply |
| **Top-down/bottom-up** | Requires a compatible dual-motor specification |
| **Fabric family** | Compatible CelloTex cellular fabrics |
| **Finished sizes** | Confirmed for the complete motor, layout and material combination |

## Options to discuss

- Standard bottom-up movement
- Assessed motorised top-down/bottom-up arrangement
- Matching transmitter and power accessories
- Suitable bracket or no-screw mounting arrangement

## Before you order

- Motor and handset compatibility must be checked against the exact references.
- A rechargeable blind needs access to its charging arrangement.
- Smart-home integration must be confirmed for the selected controls; it is not included by assumption.

## Set the movement before selecting the motor

A standard blind and a top-down/bottom-up blind have different control requirements. Let us know where you want privacy and which part of the glazing should remain uncovered, then we can specify the appropriate drive.

## Include existing control details

If the room already has powered blinds, send the handset and motor references or clear label photographs. We can assess whether a compatible control approach is available and identify any additional equipment before order.
