MOTORISED ROOF BLINDS

Hexacell G1 Extra

Product reference: G1 Extra

A G1 roof blind with moving support ribs for larger applications. Explore the practical differences and ask AdamsBlinds to assess your lantern opening.

- Moving ribs support the fabric across the opening
- Ribs retract with the fabric stack
- A project-specific alternative for larger G1 applications

Key specifications

Application	Roof lanterns needing additional fabric support
Drive	Motorised G1 belt-drive arrangement
Rib arrangement	Number and position specified for the finished blind
Rib finishes	White, grey or brown, subject to the selected specification
Size assessment	Width, drop, area, cloth and rib layout confirmed together before order
Frame finishes	White, Dark Grey, Dark Coffee or Black

Options to discuss

- Compatible CelloTex cloth chosen for light control and colour
- Appropriate mains, battery or solar-assisted power arrangement
- Rib finish coordinated with the chosen fabric
- Service-cover orientation and charging access agreed with the installation

Before you order

- Extra is not an unlimited-size version of G1; the complete opening needs assessment.
- Supporting ribs increase the retracted stack and remain visible within the extended fabric.
- Final sizes and any joined-channel arrangement must be confirmed in the written specification.

Why the ribs matter

More fabric means more load and a greater distance to support. The Extra arrangement addresses that through the blind itself. The right rib layout depends on the job; we do not sell a larger blind simply by applying a different name to the standard system.

Consider the open and closed views

Ask us to discuss the visible ribs and the expected stack at the same time. Photographs of the lantern and its position above furniture help us consider both views and select an appropriate specification.

The room photograph is a product example. Rib number, layout and appearance depend on the ordered size and fabric.
