MOTORISED ROOF BLINDS

Hexacell G1

Product reference: G1

A motorised cellular blind for roof lanterns, with concealed belt drive and an open view when retracted. Ask AdamsBlinds about sizes, fabrics and power.

- Concealed belt drive within the frame
- No spanning guide wires across the open area
- Choice of compatible fabrics, frame colours and power arrangements

Key specifications

Specification	Detail
Application	Rectangular roof lantern and roof-glazing openings, subject to survey
Operation	Motorised; single fabric stack
Minimum width	392 mm with the listed standard motor arrangement; other motors may differ
Sizing	Width, travel and total area are checked together; widths above 1900 mm should be assessed for G1 Extra
Installation depth	Published minimum 40 mm; allow any additional space required for the chosen fixing and power arrangement
Side-channel section	36 mm high × 44 mm wide
Frame finishes	White, Dark Grey, Dark Coffee or Black

Options to discuss

• Compatible CelloTex blackout, light-filtering or sheer fabric, confirmed for the selected build

• Mains supply, rechargeable battery or an assessed solar charging arrangement

• Compatible NOVO, Somfy or Ellard motor and control options

• Upward- or downward-facing service covers, agreed before manufacture

Before you order

• The published family dimensions are not a promise that every width, drop and fabric combination is available.

• Solar charging depends on glazing, light levels and panel position; a reachable charging provision may still be needed.

• A motorised screen must not obstruct a required escape route when power is unavailable.

Keep future access practical

Downward-facing covers provide access from the room side. Upward-facing covers leave a smoother underside but can make access harder if a fault leaves the blind closed. We explain the trade-off for the selected motor and power supply.

What to send for an estimate

Send the approximate opening size, a photograph looking up into the lantern and the room postcode. Tell us whether electrical power is available nearby and whether you want filtered daylight or room darkening.
