CONTROLS & ACCESSORIES

Hexacell RAEX CS3108 USB Hub

Product reference: RAEX CS3108 USB Hub

An eight-channel USB hub for compatible RAEX motors, with Tuya app connection and assessed voice-control integration.

- Adds a compatible app-control route
- Compact USB-powered format
- Eight-channel arrangement

Key specifications

Model	RAEX CS3108
Channels	Eight
Power supply	5 V USB supply
App route	Tuya for a compatible system
Voice-control route	Assessed Alexa or Google connection through the supported app setup

Options to discuss

- Supply with an assessed compatible Zebra motor system
- Ask about the appropriate USB power supply and setup
- Confirm requested app, timer or voice functions before order

Before you order

- Compatibility must be checked against the exact motor.
- Requires the appropriate network and third-party app setup.
- Not a universal gateway for all Hexacell blind families.

Plan its location

The hub needs a suitable powered USB supply and a practical position for communication with the blinds. Keep it accessible for setup and any later troubleshooting. Thick walls, distance and the building layout can affect a radio-based installation.

Separate app access from everyday operation

A compatible handset remains a useful way to operate blinds locally. Decide who should have app access and whether timers or voice control are actually needed. Third-party app functions and account requirements can change independently of the blind hardware.
