MANUAL ROOF BLINDS

Hexacell SkyLite Dual Fabric

Product reference: SkyLite Dual Fabric

Two independently movable fabrics within one manual SkyLite frame. Combine compatible light effects and request an AdamsBlinds project quote.

- Two fabric effects within one frame
- Each fabric can be moved independently
- Manual control with Type B fixing options

Key specifications

Layout	Two fabric stacks at opposite ends
Control	Each fabric moves independently by hand or compatible pole
Frame	SkyLite Type B only
Fixing	Side or face fixing, subject to the recess
Dimensions	Confirmed for the two-fabric arrangement and chosen materials
Frame finishes	White, Dark Grey or Dark Coffee

Options to discuss

- A compatible pair of CelloTex fabrics
- Matching adjustable draw pole if required
- Type B side or face fixing
- Edge treatment assessed for the required light control

Before you order

- Two stacks occupy space at opposite ends of the frame.
- Confirm that both operating rails can be reached safely in the intended position.
- Fabric pairing, dimensions and meeting-rail detail need confirmation before order.

Two light effects, one opening

Choose the pair by the way the room is used. A light-filtering fabric is useful for general daytime shading, while a blackout fabric can provide a more enclosed setting. Sheer cloth has a more open effect and should not be assumed to provide night-time privacy.

Different from a powered split stack

SkyLite Dual Fabric allows independent movement of its two materials. The motorised G1 Split Stack moves both halves together. Tell us which type of control you want, rather than choosing from the names alone.
