MANUAL ROOF BLINDS

Hexacell SkyLite MAX

Product reference: SkyLite MAX

A manual SkyLite configuration for longer roof openings, using a Type B frame. Ask AdamsBlinds to check dimensions, reach and the finished layout.

- Manual option for longer roof openings
- Type B frame with face or side fixing
- Configuration assessed alongside reach and fabric choice

Key specifications

Operation	Manual SkyLite MAX arrangement
Frame	Type B only
Standard size envelope	Width 250-1500 mm; drop 200-5900 mm, subject to the complete build
Joined side channels	Required for drops above 2950 mm
Wider requests	Individual assessment; additional sag or rail bowing may make a different system more suitable
Frame finishes	White, Dark Grey or Dark Coffee

Options to discuss

- Compatible CelloTex cloth and confirmed fabric layout
- Suitable adjustable draw pole
- Side or face fixing within an assessed recess
- Appropriate edge treatment where room darkening is required

Before you order

- A longer drop does not automatically allow a wider blind.
- Long channels contain a join; this is part of the specified construction.
- Operation and reach must remain practical along the full opening.

Check the whole opening

Send a sketch with width and length clearly marked, alongside photographs from each end. If the opening is sloping or has stepped reveals, include that detail. It affects the available rectangle, fixing surfaces and how the finished blind will sit.

Choose a realistic manual arrangement

A product may fit the dimensions yet be inconvenient to use. We assess access with the room in mind, including the furniture, pole storage and a safe standing position. You can compare G1 options if powered operation is more suitable.

Images show compatible frame and control details. The MAX fabric layout is confirmed for the selected dimensions.
