ZEBRA DAY & NIGHT BLINDS

Hexacell Zebra Chain Blind

Product reference: Zebra Chain Blind

A chain-operated day-and-night blind with alternating sheer and fabric bands. Choose the headbox, fabric reference and finishing details.

- Fine adjustment of the fabric-band overlap
- Several headbox treatments
- Named fabric references for a precise sample request

Key specifications

Specification	Detail
Control	Beaded chain with an appropriate fixed chain safety device
V3 Square size range	Width 200-2300 mm; drop 500-2600 mm
S1 Fabric Inserted size range	Width 200-2300 mm; drop 500-2200 mm
S2 Curved or S3 Fabric Wrapped	Width 200-2300 mm; drop 500-2800 mm
V3 profile colours	White, Light Grey or Black
S1 / S2 / S3 base profile	White; S1 has a fabric insert and S3 a fabric-wrapped face
Fixing arrangement	Suitable face or top fixing

Options to discuss

• V3 Square, S1 Fabric Inserted, S2 Curved or S3 Fabric Wrapped headbox

• Standard or reverse roll, where suitable

• Selected chain side and an agreed safe control length

• Band-alignment request for a group of neighbouring blinds

Before you order

• A striped blind is not a sealed blackout system.

• The chain safety device must be fitted and used as instructed.

• Published dimensions depend on the chosen fabric and complete configuration.

Plan the control position

Choose a reachable side and allow a suitable place for the chain safety device. A chair, worktop or deep window reveal can make a nominally accessible chain awkward to use. The final installation must include the appropriate safety arrangement.

Decide how the blind sits at the window

The cassette is wider than the fabric, so expect side clearance. Handles, skirting boards and a door’s opening path also need space. Tell us whether privacy at the edges or the alignment with neighbouring blinds is especially important.
