ZEBRA DAY & NIGHT BLINDS

# Hexacell Zebra Cordless Blind

Product reference: Zebra Cordless Blind

A manually adjusted day-and-night blind without a hanging operating chain. Compare headbox choices, fabrics and practical reach.

- No hanging operating chain
- Direct adjustment at the bottom rail
- Square, curved or fabric-wrapped headbox choices

## Options to discuss

• V3 Square, S2 Curved or S3 Fabric Wrapped headbox

• Compatible Zebra fabric and colour reference

• Band-alignment request across adjacent windows

## Before you order

• The S1 fabric-inserted headbox is not listed for cordless operation.

• The bottom rail must remain comfortably reachable.

• The V3 cordless maximum width is lower than the S2/S3 limit.

• Sheer bands and edge clearances mean this is not a sealed blackout system.

## Check reach before choosing cordless

A deep worktop, sofa or high sill can get in the way of the operating rail. Think about who will use the blind and how far it needs to be raised. For an out-of-reach opening, compare the motorised version rather than expecting a cordless rail to solve the access problem.

## Keep a row of blinds consistent

The headbox and fabric repeat affect how neighbouring blinds look together. Include the positions and approximate drops in your enquiry, and tell us if horizontal band alignment is a priority.
