CONTROLS & ACCESSORIES

# Hexacell Zebra Solar Panel

Product reference: Zebra Solar Panel

A solar-assistance option for compatible rechargeable Zebra motors. Confirm panel position, glazing and backup charging with AdamsBlinds.

- Can assist a compatible rechargeable blind
- Slim panel format
- Assessed alongside the blind’s power arrangement

## Key specifications

| | |
|---|---|
| **Panel size** | 401 × 50 mm |
| **Fixing** | Self-adhesive pads on a suitable surface |
| **Use** | Selected compatible rechargeable Zebra motor arrangements |
| **Compatibility check** | Motor, battery connection, cable and panel position |

## Options to discuss

- Supply with a compatible rechargeable Zebra system
- Confirm the required cable and connector
- Ask for the matched backup charger

## Before you order

- Solar assistance does not guarantee that manual charging will never be needed.
- Do not assume compatibility with G1 or freehanging motors.
- Adhesive fixing depends on surface condition and position.

## Show the proposed panel position

Include photographs of the glass, nearby frame and any overhangs, blinds or shading outside. Tell us the window’s approximate orientation if known. This helps assess whether the panel can be positioned sensibly.

## Keep charging access available

Seasonal daylight, glazing and room use can affect solar input. A compatible charger remains useful for initial charging or a top-up. Use the equipment specified for the motor and battery rather than selecting by connector shape alone.
