LITE-GLIDE PANEL BLIND SYSTEM
WITH 4 CHANNEL TRACK AND WAND OPERATION

4 Track Channel Front View

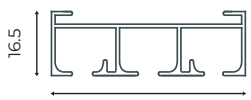

LITE-GLIDE PANEL BLIND SYSTEM

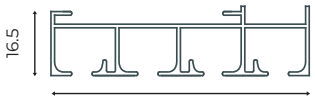

- Designed and manufactured in the UK, all Louvolite systems are 10 year life cycle tested to ensure long lasting performance.
- A contemporary way to control light, glare, virw and privacy for larger areas of glass such as floor to ceiling glazed areas and patio doors, or as room dividers.
- Manufactured using high quality aluminium and plastic materials.
- Available as 3, 4 and 5 track channels in 5m lengths or add a joining plate J4013 to lengthen.
- Split draw or one way side draw function to suit preference.
- Operation with eider a 1m or 1.5m control wand or cord with cord tidy for child safety.
- When open, the panels stack neatly behind one another.
- Used with an aluminium bottom bar, oval, dual face Gemini or Smart Rail to weight the fabric panels down.

HARDWARE SPECIFICATION

Lite-Glide Panel System

Our panel blinds are manufactured using a white coated aluminium 3, 4 or 5 track system with Nylon end caps in either cordless or corded.

The fabric panels are fixed on to the PVC self-adhesive hook bar with adhesive loop attached to the top of the fabric panel. Nylon wheeled travellers assist in smooth operation.

Operated as either side or split draw using the aluminium control wand or with 4mm Nylon cord and cord tidy.

The brackets, made from mild steel and zinc plated, are suitable for top or face fixing.

Performance

To ensure a positive performance, all system components are designed using prime quality plastic materials and powder coated aluminium and the unique turnbuckle bracket securing the track safely after installation.

10 year life cycle testing is done to ensure long lasting performance.

Operation

All blinds must be compliant with the child safety elements of BS EN13120. Where children may be present, the chain must be fitted with cord tidy devices.

Bottom Bar

Teardrop, made of aluminium, can be single or double wrapped in fabric or left exposed, while the dual face Gemini, made of aluminium, only has the fabric formed and locked into the top part to leave the bar exposed. All fabric is formed and held into place with locking tape. The dual face Gemini bar, smooth on one side and angular on the other, improves the ease of manufacture and use of thicker laminate fabrics.

Bottom Bar

Teardrop, made of aluminium, can be single or double wrapped in fabric or left exposed, while the dual face Gemini, made of aluminium, only has the fabric formed and locked into the top part to leave the bar exposed. All fabric is formed and held into place with locking tape. The dual face Gemini bar, smooth on one side and angular on the other, improves the ease of manufacture and use of thicker laminate fabrics.
