Window measuring & fitting checklist

Send these details

Number of windows, approximate recess widths and heights in millimetres, postcode, property access information, preferred operation, and photographs showing the full windows and recesses.

Look for obstructions

Handles, ventilation grilles, opening direction, doors, sockets, roller positions, tiling, ceiling details, access to power and possible child-safety fixings.

Final measures

For fitted orders, the AdamsBlinds survey confirms the finished size, fixing position and any deductions. For supply-only orders, manufacturing measurements must be agreed in writing.

Selection guidance only. Final fabric, fire rating, dimensions, controls, supplier availability and fitting method are confirmed in your written quotation. This document is not a manufacturer test certificate.
