Roman Blind Comparison

Choose the fabric, folds and operation before you order

Manual Roman blinds

Classic chain control, suitable child-safety fitting and options such as discreet Unishade and fabric-covered Cruze cassette.

Motorised Roman blinds

Select a compatible Somfy or other supported motor after considering the blind width, drop and finished fabric weight.

Cascade or stacked

Cascade retains waterfall folds. Stacked Roman blinds form a tighter gathered profile. Headrail and fabric affect stack height.

Linings

Standard/satin for a soft finished look, blackout for reducing transmission through the fabric, bonded for a fuller drape, interlining for extra body.

Light control

Roman blinds are not sealed blackout systems. Side and top gaps can remain even with blackout fabric.

Next step

Email photographs, approximate measurements and your postcode for an initial estimate. The final configuration is confirmed before manufacture.
