01 / RANGE GUIDE

Choose your skylight blind

Start with the roof window and how you want to operate the blind. AdamsBlinds checks the window reference, fabric and selected system before the order is agreed.

Manual Skylight

Spring-operated, with a bottom handle.

Solar Skylight

Motorised, with solar charging.

Custom Skylight

Manual, for a separately checked size.

Planning point	Manual Skylight	Solar Skylight	Custom Skylight
Operation	Spring system with a bottom handle	Motorised; solar charging supports rechargeable batteries	Spring system with a bottom handle
Starting information	Roof-window brand, type and size code	Roof-window brand, type and size code	Five separate frame and glass readings, plus photographs
Frame options	Silver or White	Silver in the current range	Silver or White
Control planning	Check that you can reach the handle	Smart Remote included in the current configuration	Check that you can reach the handle
Suitability	Selected roof-window models and codes	Selected roof-window models and codes	Assessed against the complete window and measurement set

Photographs show example finishes and configurations. Final fabric, frame, availability and compatibility are confirmed in the quotation. A manufacturer name by itself does not confirm that every window model is supported.

01 / RANGE GUIDE

Fabric, operation and service

Choose the light control, operating method and service you need. We check these against the roof-window details before ordering.

Light control

Fabric choice	What to discuss
Blackout	Choose for stronger light exclusion through the fabric. The fitted frame, roof window and other light sources still affect the room.
Translucent	Choose for softened daylight through the fabric. It is not a blackout finish; discuss privacy at different times of day.
Plain, patterned or children's designs	Shortlist your preferred colours or patterns. Request samples: a screen is only a guide to the actual fabric.

Operation and window checks

- ☐ **Manual:** the bottom handle must be within comfortable reach. Tell us if the window is high, above furniture or difficult to access.
- ☐ **Solar:** discuss daylight at the window, battery charging and the remote configuration. Do not assume an app, hub or voice assistant is included.

Two ways to order

Service	How the project moves forward
Made-to-measure supply only	UK supply for a confirmed compatible product. AdamsBlinds agrees the identification and measurement information required before manufacture.
Measuring and installation	Send the postcode, window count and access details. The team confirms coverage, the survey arrangement and any fee before a visit is booked.

Start with a free initial estimate
Send your window codes, photographs, postcode and blind count. Choose supply only or measuring and installation. The team reviews the details and offers appointment dates where needed.
