Clarity Low-E window film

A clear internal film for projects that prioritise thermal performance and UV reduction while retaining a view through the glass.

Clarity Low-E application example. Compatibility and performance must be confirmed for the proposed glazing.

At a glance

- Clear appearance for windows where the view matters
- Thermal and UV requirements considered in one specification
- Internal application to suitable glazing

Selected specification

Appearance	Clear
Application	Inside face of compatible glass
Product focus	Thermal performance and UV reduction
Final specification	Confirmed against the existing glazing and project requirements

Selection summary, not a technical data sheet or test certificate. The selected product and supporting information are confirmed for your project.

Planning your project

Clarity Low-E window film

Keep the view central to the decision

Use the enquiry form to tell us what is behind the glass: a seating area, shop display, desk or furniture exposed to strong daylight. If external appearance is a concern, mention that at the outset. A suitable sample can help you judge the finish against your own glass before proceeding.

Check the existing glazing first

A glass label, installer's document or photograph of the glazing helps us identify what is already fitted. Coatings and glazing construction affect the choice. We confirm compatibility and any available performance information for the proposed combination before you approve the order.

Before you order

UV filtering does not stop all fading: visible light, heat and the materials themselves also matter.

No fixed energy saving, U-value or UV percentage is specified without the relevant film and glazing data.

Clear Low-E film is not presented as a privacy film.

Measuring, supply and professional fitting

AdamsBlinds offers measuring within your project, made-to-measure film supply and professional installation. Supply-only enquiries are welcome. We confirm the film, dimensions, glazing compatibility and scope before you order.

Start with your windows

Send your pane count, approximate sizes, postcode and clear photographs, plus any glazing information. Tell us the main outcome you want. Initial estimates by email or WhatsApp are free.
