Conservatory roof film

Film for compatible glass or polycarbonate conservatory roofs, with a specification chosen around heat, glare and the way you use the room.

Glass conservatory roof application example. The film specification must be confirmed for the existing glazing.

At a glance

- An option for suitable existing conservatory roofs
- Specification guided by heat and glare concerns
- Roof and side-window requirements considered together

Selected specification

Position	Internal installation beneath compatible roof panels
Roof materials	Suitable glass or polycarbonate, subject to assessment
Main considerations	Solar heat, glare, UV and thermal requirements
Preparation	Panel dimensions, roof construction and access checked before ordering

Selection summary, not a technical data sheet or test certificate. The selected product and supporting information are confirmed for your project.

Planning your project

Conservatory roof film

Start with the problem you want to solve

Tell us when the conservatory becomes uncomfortable and how you use it. A roof above a dining table may need a different balance from one over a television or workspace. Photographs of the whole roof, its supporting frame and any available panel information help us assess the next step.

Consider the side windows too

Roof film does not address every source of direct sunlight in the room. If low sun enters through the sides, include those windows in your enquiry. Neutral or reflective privacy options may be useful there, while a clearer finish may suit windows where preserving the existing appearance matters most.

Before you order

Compatibility must be checked for the actual roof panels and glazing construction.

The result depends on the room, roof area, aspect and selected film; a particular temperature or energy saving is not promised.

Measuring, supply and professional fitting

AdamsBlinds offers measuring within your project, made-to-measure film supply and professional installation. Supply-only enquiries are welcome. We confirm the film, dimensions, glazing compatibility and scope before you order.

Start with your windows

Send your pane count, approximate sizes, postcode and clear photographs, plus any glazing information. Tell us the main outcome you want. Initial estimates by email or WhatsApp are free.
