PRODUCT SELECTION / DECORATIVE BLINDS

# Arc Curved Wood Blinds

Curved wooden slats that soften the horizontal lines of a broad Venetian.

*Product illustration. The agreed specification and finish determine the supplied product.*

Arc uses a curved abachi slat profile to create a different play of light from a flat wooden blind. The curved face becomes part of the design, adding depth when the slats are partly open and a fuller surface when they are tilted shut.

75mm and 90mm formats are listed, allowing the profile to suit a substantial window. The curve, width and chosen finish need to work together: a glossy surface emphasises the shape differently from a matt paint or wood tone.

- A shaped timber profile
- A broad architectural appearance
- Several compatible finish treatments

## At a glance

|---|---|
| **Material** | Curved abachi wood |
| **Format** | 75mm or 90mm slats |
| **Supply** | Made to measure; supply only or supply and installation |
| **Availability** | Confirmed with the factory for each quotation |

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

ARC CURVED WOOD BLINDS

# Planning your specification

## Options to discuss

- Compatible painted and wood-tone finishes
- Supported ladder cord or tape details
- Control appropriate to the width and weight

## Practical points

- Curved slats need adequate operating clearance
- The larger format may restrict manual operation
- Natural timber movement remains possible

## How it works

The slats lift into a stack above the glass and rotate within the recess. Curved profiles need sufficient depth and must clear handles and other fittings through the whole movement. The available controls and ladder details depend on the selected width.

## Choosing the finish and details

Choose the shape before narrowing the finish shortlist. A side view or profile sample is particularly useful because a front photograph does not fully show the curve. We check the opening, stack space and operation as part of the quotation.

## Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

### Ask about Arc Curved Wood Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
