PRODUCT SELECTION / VENETIAN BLINDS

Atelier Hand Finished Wood Blinds

Hand finished wooden Venetians with brushed, distressed, metallic and textured effects.

Product illustration. The agreed specification and finish determine the supplied product.

Atelier is for a window that needs a more individual surface. The range brings together hand finished wood with decorative treatments such as brushed marks, worn effects, metallic detailing and textured appearances. The slat remains the working part of a Venetian blind rather than a fixed decorative panel.

Hand application produces variation. Individual marks and the distribution of the finish will not be identical across every slat, which is part of the appeal when you want a less uniform result. A sample shows the colour and character of a treatment; it cannot show every mark on the completed blind.

- Individual surface character
- A broad range of decorative effects
- Adjustable daylight and screening

At a glance

Material	Wood with individually applied decorative finishes
Format	50mm or 70mm slats
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

ATELIER HAND FINISHED WOOD BLINDS

Planning your specification

Options to discuss

- Brushed, distressed and textured treatments
- Selected metallic or patterned effects
- Compatible ladder and control choices

Practical points

- Hand finished slats are not identical
- An effect name does not identify the underlying material
- Samples indicate character rather than an exact repeated pattern

How it works

The collection uses 50mm and 70mm slat formats, with finish compatibility checked for the chosen system. More pronounced surfaces catch side light differently from smooth paint. Compare the finish both close up and from the other side of the room, particularly if the blind sits beside patterned fabric or natural stone.

Choosing the finish and details

Tell us whether you prefer subtle texture or a more visible decorative statement. We can narrow the sample selection before the full quotation. Names describing a leather, stone or metal effect refer to the appearance of the finish unless the material specification expressly says otherwise.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.
