PRODUCT SELECTION / VENETIAN BLINDS

Cadence 35 Wood Blinds

A 35mm abachi Venetian that balances a fine horizontal pattern with a visible wood finish.

Product illustration. The agreed specification and finish determine the supplied product.

Cadence 35 is a middle-width wooden Venetian for customers who want more presence than a very narrow slat without moving to a broad architectural format. The 35mm abachi slats work well where the window proportions and surrounding joinery call for a restrained, regular finish.

The blind can be left down and tilted to soften daylight or increase screening. When you want a clearer view, it raises into a stack beneath the headrail. The practical choice is therefore about both the appearance across the window and the amount of space available above it.

- Balanced slat proportions
- A choice of cord or compatible tape detailing
- Matching wood valance

At a glance

Material	Abachi wood
Format	35mm slats
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

CADENCE 35 WOOD BLINDS

Planning your specification

Options to discuss

- Painted and timber-tone finishes
- Compatible ladder cords or decorative tapes
- Manual operation or quoted motor/crank options

Practical points

- Available sizes depend on the mechanism
- Wood is unsuitable for direct wetting
- Natural grain and small shade variations remain visible

How it works

A matching wood valance conceals the headrail. Ladder cords give a relatively unobtrusive vertical line, while compatible decorative tapes create a more pronounced contrast. Some operating and ladder arrangements need a different mechanism, so we check your selected combination before confirming the specification.

Choosing the finish and details

Compare the sample against the frame and nearby furniture in daylight. Painted finishes give a more uniform colour; timber-toned finishes retain the visual movement of the grain. Where several blinds sit together, identify them as one group so colour, controls and fitting positions can be planned consistently.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Cadence 35 Wood Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
