PRODUCT SELECTION / VENETIAN BLINDS

# Cadence Compact Wood Blinds

A compact wooden Venetian for small windows and recesses where a larger slat would feel out of scale.

*Product illustration. The agreed specification and finish determine the supplied product.*

Cadence Compact brings genuine abachi wood to smaller windows. Its closely spaced horizontal slats create a finer pattern than a broad Venetian, making it a useful starting point for narrow openings, smaller rooms and projects where the headrail space needs particular attention.

Tilting the slats lets you change the angle of incoming daylight while keeping the blind lowered. Raising the blind clears more of the glass, although the gathered slats still need space above the opening. The finish, headrail and operating method are considered together so that a compact appearance does not come at the expense of everyday use.

- Fine slat spacing for smaller openings
- Genuine timber texture
- Adjustable daylight with the blind lowered

## At a glance

| | |
|---|---|
| **Material** | Abachi wood |
| **Format** | Compact profile; precise slat measurement confirmed on quotation |
| **Supply** | Made to measure; supply only or supply and installation |
| **Availability** | Confirmed with the factory for each quotation |

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

CADENCE COMPACT WOOD BLINDS

# Planning your specification

## Options to discuss

- Compatible painted or wood-tone finishes
- Matching wood valance
- Manual or specialist operation subject to specification

## Practical points

- Natural timber varies in grain and tone
- Compact models have their own width limits
- The raised stack and handle clearance need checking

## How it works

This is a made-to-measure timber blind, with a matching wood valance to cover the mechanism. The compact slat and headrail specification is checked before quotation: the narrow format has different size limits from the wider wood ranges. Window handles and inward-opening sashes are particularly relevant when planning its position.

## Choosing the finish and details

Choose a painted or wood-tone finish from the compatible compact range. A small sample is useful for comparing colour with joinery, but natural grain will vary across a full blind. We confirm the precise slat profile and current finish availability for your order.

## Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

### Ask about Cadence Compact Wood Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
