PRODUCT SELECTION / DECORATIVE BLINDS

Guided Wood Blinds for Curved Windows

Guided wood blinds for specialist curved-window layouts.

Product illustration. The agreed specification and finish determine the supplied product.

Guided Wood is intended for windows where a conventional straight-hanging Venetian would not follow the opening. Side guides support the slats along the specified curve, allowing a timber blind to be considered for specialist interiors such as boats and other shaped-window projects.

This is a project-specific system. The curve, glazing position, fixing points and access all affect feasibility. A standard width and drop alone are not enough to define the product, so we review drawings, photographs or templates before confirming a suitable solution.

- Guided movement along a shaped opening
- Coordinated timber guides
- A specialist route for curved windows

At a glance

Material	Wood slats with shaped side guides
Format	Profile and dimensions designed for the opening
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

GUIDED WOOD BLINDS FOR CURVED WINDOWS

Planning your specification

Options to discuss

- Supported timber slat profiles
- Guide finish to coordinate with the blind
- Motor or other approved operation

Practical points

- Feasibility depends on the actual curve and fixings
- A normal rectangular measurement is insufficient
- Specialist project approvals are not implied

How it works

The guides are finished to coordinate with the slats. Supported profiles vary, and motor operation may be appropriate where access is awkward. Any electrical, marine or other project requirements must be agreed for the installation rather than assumed from the product's intended application.

Choosing the finish and details

Start with a clear view of the entire window and an explanation of the curvature. If plans are available, include them with the enquiry. We can then establish what additional survey information is required and whether the current production options suit the job.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Guided Wood Blinds for Curved Windows

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
