PRODUCT SELECTION / DECORATIVE BLINDS

Decorated Aluminium Venetian Blinds

Aluminium Venetian slats with applied decorative surfaces and material effects.

Product illustration. The agreed specification and finish determine the supplied product.

Decorated Aluminium offers the structure of a metal slat with a separate decorative finish. Available effects include selected wood-like, woven, stone-like and metallic appearances. These describe the surface design rather than replacing the aluminium beneath it.

The range is listed in 70mm and 90mm formats. A wider slat displays more of the chosen texture or pattern, while its sheen can become more noticeable in direct light. The finish should be viewed in the context of the whole room rather than selected from a colour name alone.

- Decorative surfaces on a metal support
- Several textures and sheen levels
- Broad slat formats

At a glance

Material	Aluminium with an applied decorative surface
Format	70mm or 90mm where supported
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

DECORATED ALUMINIUM VENETIAN BLINDS

Planning your specification

Options to discuss

- Compatible wood-like, textured and metallic effects
- Supported slat proportions
- Control and trim selected for the complete blind

Practical points

- Surface effects are not solid wood or stone
- Composition varies with the finish
- Performance requirements need product-specific confirmation

How it works

The applied surface and slat profile are specified as a compatible product. The control needs to suit the width and weight, and sufficient space is required for the blind to turn and stack. We check finish direction and available dimensions before confirming the quote.

Choosing the finish and details

For a commercial interior, tell us about any material or performance requirements alongside the design brief. Technical evidence must relate to the exact surface and assembly. For a domestic room, a shortlist of physical samples usually helps establish the right texture and sheen.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Decorated Aluminium Venetian Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
