PRODUCT SELECTION / COMPONENTS AND FINISHING DETAILS

Decorative Blind Tapes

Plain and patterned ladder tapes selected to suit the blind, slat pitch and finish.

Product illustration. The agreed specification and finish determine the supplied product.

Decorative tapes run vertically down the face of a Venetian and support its slats. They can blend into the main colour or create a deliberate contrast. The choice changes the appearance of the whole blind, so it is worth reviewing the tape beside the slat sample.

Compatibility involves more than the visible tape width. The ladder spacing must suit the slat and the mechanism, and not every tape is offered with every material or profile. We identify the correct construction before supplying a component or including it in a complete blind.

- A visible decorative detail
- Plain and patterned options
- Specification alongside the slat finish

At a glance

Material	Textile ladder tape
Format	Visible width and ladder pitch selected for the system
Supply	Quoted to the agreed product, finish and quantity
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

DECORATIVE BLIND TAPES

Planning your specification

Options to discuss

- Compatible plain colours
- Selected patterns and textures
- Matched or contrasting colour arrangements

Practical points

- Tape width alone does not prove compatibility
- Minimum quantities can vary by item
- Existing faded fabric may not match a new batch

Specifying the item

The collection includes plain colours and selected patterned or textured options. Tape names and sample codes in the enquiry are checked against the current production range. A photograph of an existing blind is useful, but a close visual match alone does not establish technical compatibility.

Choosing the finish and details

For a complete project, select the tape with the blind finish and operating system. For a component enquiry, send the required quantity, dimensions and any existing product reference. Availability and any production minimum are confirmed in the quotation.

Supply and project support

AdamsBlinds can quote for compatible components on a supply-only basis or specify them within a complete supply and installation project. Send dimensions, photographs and the required quantity. We confirm compatibility, factory availability and any production minimum before an order is agreed.

Ask about Decorative Blind Tapes

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
