PRODUCT SELECTION / DECORATIVE BLINDS

Embossed Leather Look Blinds

Synthetic coverings with embossed, woven, metallic and leather-like decorative effects.

Product illustration. The agreed specification and finish determine the supplied product.

Embossed Leather Look is a collection of decorative synthetic surfaces. Some are smooth and understated; others use raised patterns, metallic sheen, woven effects or animal-inspired textures. The range gives considerable freedom over appearance without describing these materials as genuine leather.

The finish is applied over a supporting slat, with 50mm, 70mm and 90mm formats available across the collection. Construction and composition vary between finishes, so we confirm the chosen material rather than applying one technical specification to the entire range.

- Wide decorative choice
- Several levels of texture and sheen
- A clear alternative to genuine leather

At a glance

Material	Synthetic decorative covering over a specified support
Format	50mm, 70mm or 90mm; finish-dependent
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

EMBOSSED LEATHER LOOK BLINDS

Planning your specification

Options to discuss

- Smooth, embossed and patterned surfaces
- Compatible wood or aluminium support
- Coordinated stitching or ladder details where applicable

Practical points

- Material composition varies by finish
- Do not assume one fire classification covers every option
- Pattern direction can affect wider blinds

How it works

Surface texture changes how a blind catches light. A glossy pattern may become more prominent beside a bright window, while a matt treatment gives a quieter result. Some coverings also have a direction which can change on larger blinds; this is checked during specification.

Choosing the finish and details

Select two or three finishes that suit the room and compare physical samples where available. For commercial projects, provide any required fire or material criteria early. Relevant evidence must relate to the precise finish and assembled product being quoted.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Embossed Leather Look Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
