PRODUCT SELECTION / VENETIAN BLINDS

Layered Timber Venetian Blinds

Engineered veneer slats with a layered wood appearance and metallic finishing details.

Product illustration. The agreed specification and finish determine the supplied product.

Layered Timber uses engineered laminated wood made from natural veneers. The resulting surface has a different visual character from a single solid timber slat. It is a useful route when you want a defined wood pattern with a more contemporary finish around the mechanism.

The catalogue construction pairs the layered slats with silver-coloured metallic valance and control detailing. That combination can work with metal window frames or fittings, while the veneer keeps a visible connection to wood. The final specification confirms which details are included with the chosen finish.

- Layered veneer character
- Metallic trim detailing
- A distinct alternative to solid timber

At a glance

Material	Engineered laminated natural wood veneer
Format	50mm or 70mm slats
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

LAYERED TIMBER VENETIAN BLINDS

Planning your specification

Options to discuss

- Compatible veneer finishes
- Silver-coloured valance and detailing as specified
- Control choice assessed for weight and size

Practical points

- Engineered veneer is not solid single-species timber
- No blanket sourcing certification is implied
- Colour and available dimensions require confirmation

How it works

50mm and 70mm slat formats are listed for this range. As with other Venetians, the slats tilt and the blind lifts into a stack, but the weight and construction must be assessed for the required size and operation. Engineered veneer should not be described as a single solid species.

Choosing the finish and details

Look at both the pattern direction and the colour of a sample. A close-up can be quite different from the repeated horizontal effect across a window. We can check a small shortlist against the intended frame colour before preparing a project quotation.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.
