PRODUCT SELECTION / DECORATIVE BLINDS

Pierced Wood Venetian Blinds

Wooden Venetian slats with cut-out patterns or a commissioned decorative motif.

Product illustration. The agreed specification and finish determine the supplied product.

Pierced Wood uses openings within the timber slats to create a visible pattern across the blind. The cut-out design allows light through selected parts of the surface, giving a different result from a plain wooden Venetian even when the slats are closed.

The range supports several slat formats, including selected curved profiles. Pattern, opening size and the remaining timber must be assessed together. A design that works on one slat width cannot automatically be transferred to every other format.

- Pattern cut through the slat
- Custom-design enquiry possible
- Light passing through the decorative openings

At a glance

Material	Pierced abachi wood
Format	Multiple compatible widths and selected curved profiles
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

PIERCED WOOD VENETIAN BLINDS

Planning your specification

Options to discuss

- Compatible existing cut-out patterns
- Bespoke motifs subject to assessment
- Supported wood finishes and ladder arrangements

Practical points

- Cut-outs reduce opacity
- Designs must suit the slat width and construction
- Custom feasibility is confirmed before order

How it works

An unobtrusive ladder arrangement can help the cut-out pattern remain the main feature. The precise pattern and its position across the blind are reviewed before manufacture. Because the openings transmit light, the product should not be selected as a blackout solution.

Choosing the finish and details

Provide a sketch or clear reference if you want a commissioned motif. We can assess whether the design is feasible and explain any changes needed for the selected slat. The finished layout, colour and controls are then confirmed for the order.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Pierced Wood Venetian Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
