PRODUCT SELECTION / WOOD AND SCREEN

Wood and Screen Roller Blinds

A technical screen roller decorated with wood or aluminium strips.

Product illustration. The agreed specification and finish determine the supplied product.

Wood and Screen Roller attaches horizontal strips to a technical fabric, combining the movement of a roller blind with the visual line of wood or metal. The fabric remains the continuous backing, while the spacing of the strips creates the pattern.

Wood strips are offered in 10mm or 25mm formats, with aluminium options in 11mm, 18mm or 25mm. The number and arrangement of strips affect both the appearance and the size of the roll when the blind is raised. The selected material and layout are confirmed together.

- Screen fabric with horizontal detailing
- Wood or aluminium options
- Configurable strip arrangement

At a glance

Material	Technical screen fabric with wood or aluminium strips
Format	Wood strips 10/25mm; aluminium 11/18/25mm
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

WOOD AND SCREEN ROLLER BLINDS

Planning your specification

Options to discuss

- Compatible screen fabrics
- Supported strip material and finish
- Assessed strip spacing
- Chain-control position

Practical points

- The strips do not tilt independently
- Strip density increases the top roll size
- Fabric and strip combinations require confirmation

How it works

The blind rolls around an aluminium tube and uses a specified chain-control arrangement. Its brackets and tube are selected for the completed size. Because the strips add thickness, the raised roll needs more careful clearance planning than an ordinary thin screen fabric.

Choosing the finish and details

Choose the fabric's screening effect first, then the strip material, colour and spacing. We can assess a proposed layout and explain any constraints. This product does not tilt like a Venetian; light control comes from the screen and from raising or lowering the blind.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Wood and Screen Roller Blinds
