PRODUCT SELECTION / VENETIAN BLINDS

Selected Timber Wood Blinds

Made-to-measure Venetians specified by their actual timber species and finish.

Product illustration. The agreed specification and finish determine the supplied product.

Selected Timber is intended for projects where the wood itself matters. The available options include several distinct species and stained finishes, each with its own grain, colour and practical size limits. We confirm the actual timber in the quotation rather than relying on a decorative colour name.

This is useful when a designer wants the blind to sit alongside a particular floor, wall lining or piece of joinery. Different woods will still vary naturally, and a photograph is not enough to approve a close match. A physical sample and a clear description of the surrounding materials help make the selection more reliable.

- Species-specific selection
- Natural grain visible across the slats
- Clear distinction between timber and stain

At a glance

Material	Specified natural timber; species confirmed per option
Format	50mm slats
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

SELECTED TIMBER WOOD BLINDS

Planning your specification

Options to discuss

- Available natural and stained timber finishes
- Species choice subject to size and supply
- Coordinated controls and valance

Practical points

- Maximum dimensions vary significantly by timber
- Stain names must not be read as species claims
- Natural shade variation continues within an individual blind

How it works

The range is based on 50mm slats. Available width depends on the chosen timber: it cannot be treated as one universal maximum. Some darker effects are achieved by staining another species, so a finish with a familiar wood name may not be made from that same wood.

Choosing the finish and details

Start with the species or appearance you need and the dimensions of the opening. We then check whether the selected timber, finish and control can be supplied in that size. Any project requirement for documented sourcing should be raised with the enquiry and confirmed for the specific order.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Selected Timber Wood Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
