PRODUCT SELECTION / COMPONENTS AND FINISHING DETAILS

Wood Slats and Mouldings

Timber slats and mouldings supplied to an agreed profile, finish and quantity.

Product illustration. The agreed specification and finish determine the supplied product.

Wood Slats and Mouldings is a component enquiry range for projects that need the material rather than a complete fitted blind. Available options include basswood and selected other timbers, with the actual species, profile and finish confirmed for the order.

A component must be specified more precisely than a finished appearance. Slat width, thickness, edge shape, length and any routing or drilling all affect whether it will work in the intended assembly. We review those details before confirming a supply option.

- Component-focused supply
- Specified timber and finish
- Profile reviewed before quotation

At a glance

Material	Basswood and selected other timbers; confirmed by item
Format	Profile and length supplied to an agreed specification
Supply	Quoted to the agreed product, finish and quantity
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

WOOD SLATS AND MOULDINGS

Planning your specification

Options to discuss

- Available timber species
- Compatible painted or stained finish
- Profile, edge and machining requirements subject to assessment

Practical points

- Minimum production quantities may apply
- A visual match does not establish mechanical fit
- Natural timber and finish batches vary

Specifying the item

Painted and stained finishes can be considered where supported by the production range. A colour reference helps describe the target, but it does not guarantee an exact match to aged or previously finished timber. A sample may be needed for approval.

Choosing the finish and details

Send a drawing or clear photographs with dimensions and the number of pieces required. Explain whether they are for a new assembly or an identified existing product. Factory availability, production quantities and any finishing requirements are set out in the quotation.

Supply and project support

AdamsBlinds can quote for compatible components on a supply-only basis or specify them within a complete supply and installation project. Send dimensions, photographs and the required quantity. We confirm compatibility, factory availability and any production minimum before an order is agreed.

Ask about Wood Slats and Mouldings

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
