PRODUCT SELECTION / VERTICAL BLINDS

Textile Covered Vertical Blinds

Fabric-covered vertical slats with a defined support and a choice of textile effects.

Product illustration. The agreed specification and finish determine the supplied product.

Textile Covered Vertical combines a fabric surface with a structured slat. The 89mm format can connect the window treatment with upholstery and other soft furnishings while keeping the regular shape of a vertical blind.

The collection contains different constructions. Depending on the textile, the support may be wood, aluminium or PVC, and the composition of the covering also changes. We specify the actual combination rather than treating every cloth as interchangeable.

- Textile appearance with a structured form
- Several material combinations
- Tilting and sideways movement

At a glance

Material	Textile on wood, aluminium or PVC; finish-dependent
Format	89mm vertical slats
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

TEXTILE COVERED VERTICAL BLINDS

Planning your specification

Options to discuss

- Compatible plain, denim-like or textured fabrics
- Supported slat construction
- Track and draw configuration

Practical points

- Material composition varies by option
- Not every textile supports the same dimensions
- Technical criteria require finish-specific confirmation

How it works

The slats turn to change the light and gather sideways along the track. Texture and pattern direction can be more visible over the height of the window than in a small sample. The fitting position needs to allow full rotation without contact with nearby handles or furniture.

Choosing the finish and details

For a close furnishing match, provide a reference sample or clear material details. For a commercial project, include any required technical criteria. We then check compatible textiles, current availability and the practical track arrangement.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Textile Covered Vertical Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
