PRODUCT SELECTION / WOVEN WOOD AND BAMBOO

Traditional Folded Woven Blinds

A folded woven blind on a simple wooden headrail, with natural material detail.

Product illustration. The agreed specification and finish determine the supplied product.

Traditional Folded Woven uses a timber headrail and a flexible woven face that gathers into folds. The simpler top construction keeps the material at the centre of the design and gives a different character from a covered metal system.

The fold size follows the blind's overall drop. When raised, one folded section and the lower finishing detail remain at the top. This should be considered early if the opening is shallow or the window swings into the room.

- Traditional timber top construction
- Natural woven texture
- A visible folded stack

At a glance

Material	Woven wood or bamboo on a timber headrail
Format	Fold dimensions set by the blind drop
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

TRADITIONAL FOLDED WOVEN BLINDS

Planning your specification

Options to discuss

- Compatible wood and bamboo weaves
- Supported top-turn and edge details
- Control position suited to the opening

Practical points

- The folded stack remains visible when raised
- Open weave does not guarantee privacy
- Current operation and safety details require specification

How it works

Compatible weaves include several wood and bamboo patterns. A matching turn of the material can finish the top where supported. The control side and current compliant operating arrangement are confirmed for the installation rather than copied from an old cord layout.

Choosing the finish and details

Tell us whether you prefer the natural texture to be open to daylight or whether privacy is the main concern. We can review the selected weave and the proposed headrail position, then confirm available edging and control details.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Traditional Folded Woven Blinds

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
