PRODUCT SELECTION / WOVEN WOOD AND BAMBOO

Woven Wood Sliding Panels

Broad woven wood panels that slide sideways across a multi-channel track.

Product illustration. The agreed specification and finish determine the supplied product.

Woven Wood Sliding Panels use broad sheets of woven material rather than narrow slats. The panels move across an overhead track, creating a calm vertical division across large glazing or a visual screen within a room.

The surface is formed from compatible wood or bamboo weaves. Each panel displays more of the pattern than a narrow vertical slat, so the texture remains prominent at room scale. The number and width of the panels depend on the opening and where they should park.

- Broad natural-texture panels
- Sideways movement
- A layout suited to wide openings

At a glance

Material	Woven wood or bamboo panels
Format	Panel proportions designed for the opening
Supply	Made to measure; supply only or supply and installation
Availability	Confirmed with the factory for each quotation

Selection guide, not a technical certificate or confirmed order specification. Dimensions, finishes and availability are agreed in your quotation.

WOVEN WOOD SLIDING PANELS

Planning your specification

Options to discuss

- Compatible woven designs
- Assessed number of track channels
- Manual or supported powered operation

Practical points

- Parked panels occupy space
- Open weaves do not create opaque room separation
- Track fixing and panel overlap must be planned

How it works

A multi-channel track lets the panels pass and overlap. The parked panels still occupy part of the width, which needs to be considered around doors and circulation routes. The selected track, brackets and manual or supported powered operation are confirmed with the layout.

Choosing the finish and details

Provide the overall opening width and indicate which side should remain clear when open. We can then work through panel proportions, overlap and the chosen weave. A sliding panel is a visual divider, not a substitute for a door where sound or environmental separation is required.

Measuring, supply and installation

AdamsBlinds provides measuring as part of a supply and installation project, plus made-to-measure supply-only quotations. Send approximate dimensions, photographs and the number of blinds required to get started. We confirm the specification and final sizes before manufacture. Factory availability, order quantity and any discontinued options are checked for your quotation.

Ask about Woven Wood Sliding Panels

Send your postcode, approximate quantity, opening sizes and photographs. Tell us whether you need supply only or measuring and installation.
