Perfect Fit® pleated cellular blinds

Features:

Our Perfect Fit® pleated cellular blinds feature an aesthetically pleasing design that provides better insulation than a standard blind. Produced under short lead times in our UK factory. This blind can be installed in minutes because no screwing or drilling is required.

Benefits:

Installing Perfect Fit® pleated cellular blinds is simple. Slide the small metal brackets into the seal of the window or door. Align the slots in the frame with the four brackets and push the blind into place. No holes need to be drilled into the uPVC frame, saving a drastic amount of time.

This cellular design traps air inside the cells, providing great insulation during summer and winter. The spring tension system means the blind is operated by hand. Ideal for glass doors and windows that open inwards because they would knock into a standard blind. This blind attaches to the window meaning it moves with it. Our Perfect Fit® pleated cellular blinds can be installed upside down and are operated by a handle on the bottom bar, which is great for cafes and other storefronts.

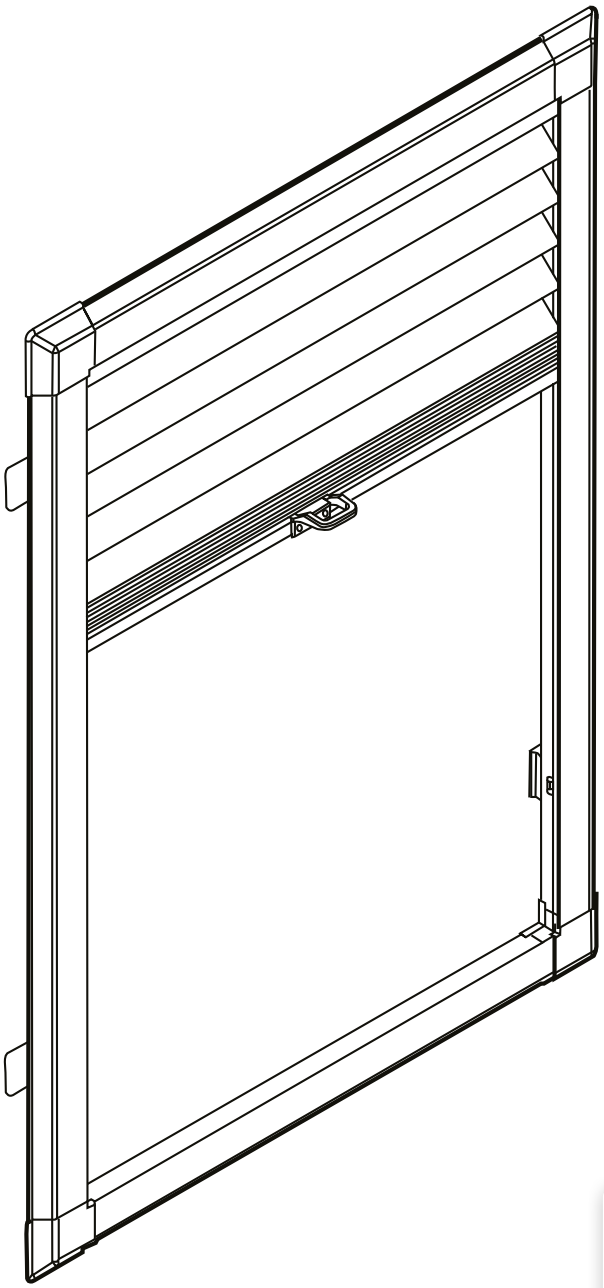

Fitting the blind directly to the window ensures that there are no gaps that light can enter through, achieving better light control. Perfect Fit® blinds are completely child-safe because there are no hanging cords or loops. Delivered free from damage.

Options:

Frame colour options: White, Black, Anthracite. Other colours available on request.

Specification:

The YewdaleDefiant® Perfect Fit® pleated cellular blind incorporating an aluminium frame, window fixing brackets, end caps and corner joints. The main default hardware colour for the Perfect Fit® blinds is white. All fabrics in the YewdaleDefiant® range is flame retardant.
